Brand New Book ***** Print on Demand *****.Excerpt from Principles of Sanitary Science and the Public Health: With Special Reference to the Causation and Prevention of Infectious Diseases With the single exception of the change effected by the acceptance of the theory of organic evolution, there has probably been no modification of human opinion within the nineteenth century more wonderful, or more profoundly affecting the general conduct of human life, than that in our attitude toward the nature, the causation and the prevention of disease. The modern conception of the living body, whether plant or animal, as essentially a physical mechanism, is largely the result of discoveries in the domain of physics and chemistry begun, indeed, but not perfected, before the recent century. The modern conception of disease as due to imperfection, misbehavior or disturbance of a physical mechanism depended for its development on an acquaintance with the physiology of the body and its microscopic structure which did not exist before the introduction, in the third decade, of the achromatic objective. The microscopical renaissance which began with this pregnant invention speedily led to discoveries...
