

Land use planning

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1988 Excerpt: . . . landscaped or can preserve existing vegetation. They often buffer conflicting activities or transportation modes or connect outdoor activity areas, such as parks. (5) Open space meets positive human needs. It is an area where a user can find fresh air, sunlight, recreation, physical exercise, and psychological release. (6) It is essential that the airfield be bordered by open space buffers to create the clear zones necessary to absorb the fields impacts on its environs. Because of their attractiveness to birds, water and wetlands should not be included in the open space buffer of an airfield. (7) Open space is necessary for, and often is co-located with, land used for outdoor recreation. The presence of open space is also important to residential uses, both family and troop housing. To all other installation land uses, open space is compatible and a prized asset. The location of open space is driven by the environmental...
